

A Life Skills Initiative by Spectrum NGO PROJECT JEEVAN SHIKSHA

**DEDICATED
TO INDIA 2036...**

The journey so far...

Spectrum came into being in 1992. We have a single, powerful objective - to bring thinking, well-informed women together on a single platform that empowers them to both grow as individuals as well as bring about positive social transformation. Through the decades that have followed our inception, we have evolved into a movement guided by our core belief – **Action for Impact**.

We are always grateful for the support and encouragement from our Board:

**Sabina Sanghvi, Anu Aga,
Freny Tarapore, Arnavaz Damania,
Dr. Jaya Firodia, Dr. Abhay Firodia, Malati Kalmadi.**

Today, Spectrum operates through two arms – **Spectrum Ahead**, a study group and **Spectrum NGO**, which in turn works for need based causes, and in two verticals : Rain water Harvesting, and Education. All our efforts are a reflection of our commitment to nation building.

Project Jeevan Shiksha is the education vertical of Spectrum NGO.

And our journey?

...Allow us to start from 2036!

Once upon a 2036...

In **2013**, only **1.5% of IIT students** came from families earning under ₹1 lakh a year.¹

By **2017**, that number jumped to **11.7%**.²

Today, **26% of students at IIT Kanpur** come from similar backgrounds.³

Rinku Singh, now one of India's most celebrated cricketers, is proud of his father who once delivered **LPG cylinders**.

Across sectors, the story repeats itself.

The story of India is the story of young children from underprivileged backgrounds taking their rightful place not just in the mainstream, but in the most elite spaces the country has to offer.

The fairy tales we grew up with started in a time long ago, in a land far away.

Project Jeevan Shiksha, however, is not just a fairy tale but a story of possibilities.

And it starts with what our children will be in **2036**!

1 - *Times of India*: <https://sl1nk.com/2dt3533>

2 - *Ibid*.

3 - According to the "Students Statistics" as released annually by the Council of Indian Institutes of Technology.

Why 2036?

The children sitting in our classrooms today will be in their twenties by 2036.

They will be taking interviews. Starting businesses. Entering professions. Building careers.

Creating trajectories that nobody in their family has ever imagined.

We see them already. Not as they are today but as the people they are becoming.

Confident. Resilient. Equipped.

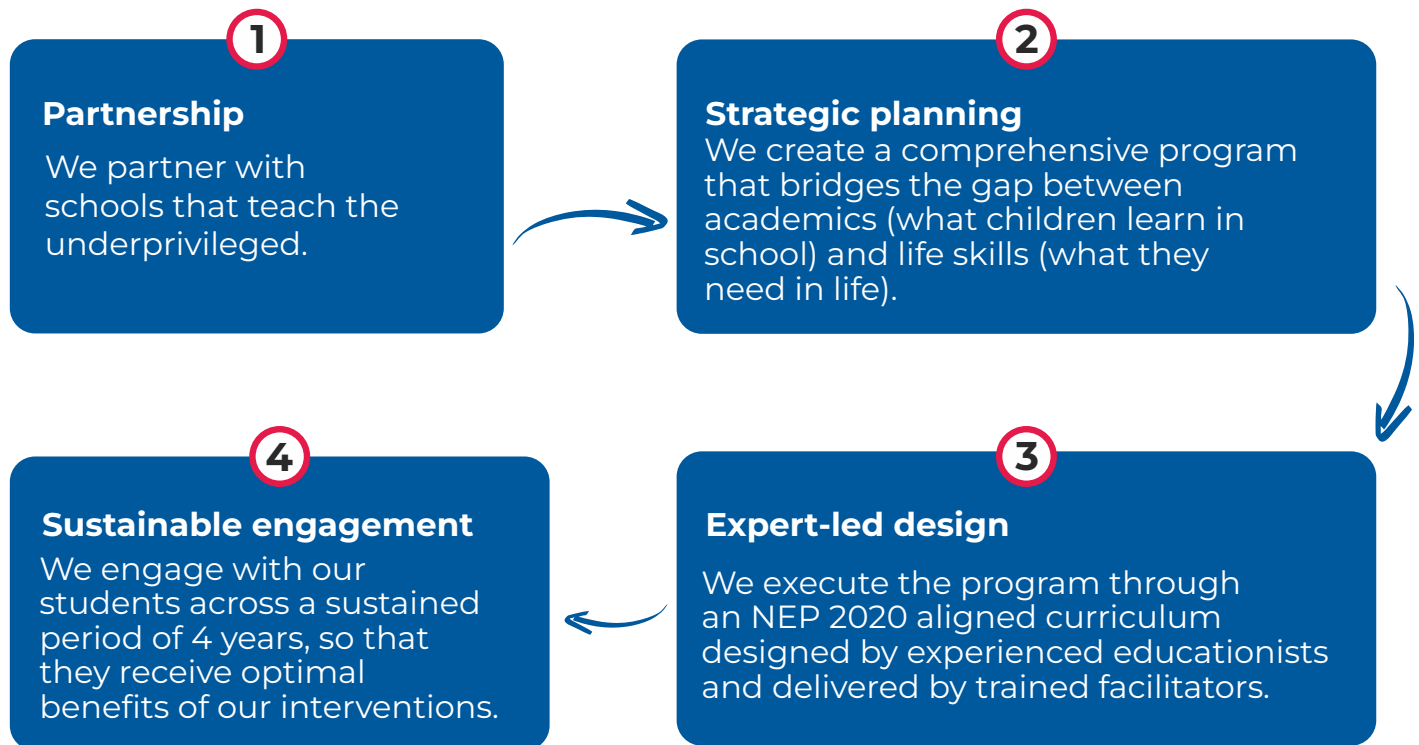

Project Jeevan Shiksha is a unique Life Skills Development Program of Spectrum NGO. It has been designed to give these underserved students the skills, the ecosystem and the opportunities to take their rightful place in the India of tomorrow.

The road to 2036

Our Path

Project Jeevan Shiksha acknowledges that schools are doing their very best in giving the students a strong foundation in academics. We step in as their partners and empower their students from grades 5 to 9 with Life Skills, Social-Emotional Learning and Conversational English.

The result? A measurable positive impact on confidence, resilience, optimism and social - emotional skills.

Our Process

Weekly
interactive
sessions

Every session
engages the
head, heart,
and hands

Children
participate in
role plays,
discussions,
and group
activities

Focus on
real-life
application

Impact
measurement
using assessment
tools designed
by experts

Our Footprint

5 years

6 mentors

11 schools

50 facilitators

1800+ students

Meet our Stars of 2036!

The child
who now
dares
to dream.

Our children
who now work
as a team.

The stories that speak loud and clear.

The shoulders that hold no sadness, no fear.

Our children who laugh with stars in their eyes...
That's our fuel. Their future? Our prize!

We work with children who come from lives that challenge them.

When we first meet them, they are most often diffident, unsure of themselves, hesitant, reticent.

But through our time with them we see them blossom.

They **open up**. They **participate**. And then they **transform**.

It is a progressive journey that we at Project Jeevan Shiksha hold sacred.

Today, over 1800 students have undertaken that journey with us.

At Project Jeevan Shiksha, these students are our heroes. And we will keep doing everything we can so that their tribe grows.

Partner with us to build India 2036
